Regarding the Assessment of Knowledge and Understanding of Sustainable Development Goals (SDGs) in the Comprehensive Examination of 2023

The United Nations' Sustainable Development Goals (SDGs) serve as a crucial framework for promoting balanced and sustainable development across social, economic, and environmental dimensions. Knowledge and understanding of the SDGs are fundamental for students and new professionals to actively contribute to a better future.

Recognizing the importance of inculcating knowledge of the SDGs among its students, Rajapruk University has decided to incorporate an assessment of students' understanding of these goals into the comprehensive examination for final-year students. This assessment aims to evaluate students' ability to apply SDG concepts in real-world contexts and foster a deeper understanding of sustainable development at the individual, community, and societal levels.

This initiative reflects the university's commitment to producing graduates who are not only academically qualified but also possess a strong sense of social responsibility and sustainability.
